

INVESTOR PRESENTATION

January 2025

FORTIS INC.

FORWARD LOOKING INFORMATION

Fortis includes forward-looking information in this presentation within the meaning of applicable Canadian securities laws and forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (collectively referred to as "forward-looking information"). Forward-looking information reflects expectations of Fortis management regarding future growth, results of operations, performance and business prospects and opportunities. Wherever possible, words such as anticipates, believes, budgets, could, estimates, expects, forecasts, intends, may, might, plans, projects, schedule, should, target, will, would, and the negative of these terms, and other similar terminology or expressions have been used to identify the forward-looking information, which includes, without limitation: forecast capital expenditures for 2025 and 2025-2029, including energy transition investments; forecast rate base for 2025 and 2029 and rate base growth for 2024 through 2029; the 2050 net-zero direct GHG emissions target and interim 2030 and 2035 GHG emissions reduction targets; the expectation to have a coal-free generation mix by 2032; annual dividend growth guidance through 2029; expected sources of funding for the Corporation's Capital Plan; expected sources of common equity proceeds; the expectation of a consistent capital structure over the planning period; the expectation that the long-term dividend guidance will support a reduction in dividend payout ratio over time; forecast average cash flow to debt metrics over the next five years; the nature, timing, benefits and expected costs of additional opportunities beyond the Capital Plan and other key transmission investments, including ITC's investments related to Tranches 2.1 and 2.2 of the MISO LRTP, customer connections including investments related to Alliant Energy's Big Cedar Industrial Center, new data center manufacturing opportunities, renewable gas solutions and liquefied natural gas infrastructure investments in British Columbia, and regional transmission with the New York Transco; the expected timing, outcome and impact of legal and regulatory proceedings and decisions; forecast capital expenditures for 2025-2029 by business unit; the nature, timing, benefits and expected costs of certain capital projects, including ITC's transmission projects associated with the MISO LRTP Tranches 1 & 2.1, UNS IRP Related Generation, UNS Roadrunner Reserve Battery Storage Projects 1 & 2, UNS Vail-to-Tortolita Transmission Project, FortisBC Eagle Mountain Pipeline Project, FortisBC Tilbury LNG Storage Expansion, FortisBC AMI Project and the FortisBC Tilbury 1B Project; forecast rate base and rate base growth for 2025-2029 by business unit; FortisBC targets to support the energy transition and reduce GHG emissions; forecast debt maturities for 2025-2034; and scheduled preferred share dividend rate resets.

Forward-looking information involves significant risks, uncertainties and assumptions. Certain material factors or assumptions have been applied in drawing the conclusions contained in the forward-looking information including, without limitation: reasonable legal and regulatory decisions and the expectation of regulatory stability; the successful execution of the Capital Plan; no material capital project or financing cost overrun; sufficient human resources to deliver service and execute the Capital Plan; the realization of additional opportunities beyond the Capital Plan; no significant variability in interest rates; the continuation of current participation levels in the Corporation's dividend reinvestment plan; no material changes in the assumed U.S. dollar to Canadian dollar exchange rate; the continuation of current participation levels in the Corporations DRIP; the Board exercising its discretion to declare dividends, taking into account the financial performance and condition of the Corporation; no significant operational disruptions or environmental liability or upset; the continued ability to maintain the performance of the electricity and gas systems; no severe and prolonged economic downturn; sufficient liquidity and capital resources; the ability to hedge exposures to fluctuations in foreign exchange rates, natural gas prices and electricity prices; the continued availability of natural gas, fuel, coal and electricity supply; continuation of power supply and capacity purchase contracts; no significant changes in government energy plans, environmental laws and regulations that could have a material negative impact; maintenance of adequate insurance coverage; the ability to obtain and maintain licenses and permits; retention of existing service areas; no significant changes in tax laws and the continued tax deferred treatment of earnings from the Corporation's foreign operations; continued maintenance of information technology infrastructure and no material breach of cybersecurity; continued favourable relations with Indigenous Peoples; and favourable labour relations.

Unless otherwise specified, all financial information is in Canadian dollars and rate base refers to midyear rate base.

Note: U.S. dollar-denominated capital expenditures and rate base converted at a forecast USD:CAD foreign exchange rate of 1.30 for 2025-2029.

OUR VISION & STRATEGY

A Premium North American Utility Delivering a Cleaner Energy Future

SUSTAINABLE GROWTH

- Operational Excellence
- Financial Strength
- Diversified Regulated Portfolio
- Local Business Model
- Strong Governance

OUR COMMON GROUND

Provision of Safe & Reliable Service

Priority #1

- Health and safety of our employees, customers and contractors
- Doing whatever it takes to ensure safe and reliable service to our 3.5M customers
- Consistently outperforming industry averages in both Canada and the U.S.

Good Governance

Fortis Ranked #1 out of 215 S&P/TSX companies in The Globe & Mail 2024 Board Games

- Utilities operate within the parameters of common policies and best practices
- Local business model with subsidiary boards comprised of a majority independent local directors
- Subsidiary boards provide effective independent oversight and administration of their governance and operations

DELIVERING SAFE & RELIABLE SERVICE

All-Injury Frequency Rate⁽¹⁾

■ Fortis
 - - - USA Bureau of Labor Statistics (2019-2023 Average)
— Canadian Electricity Association (2019-2023 Average)

Average Electricity Customer Outage Duration (Hours)

■ Fortis⁽²⁾
■ Electricity Canada and U.S. Energy Information Administration Average

(1) All injury frequency rate = (# injuries x 200,000) / hours worked.
 (2) Based on weighted average of Fortis' customer count in each jurisdiction.

MAINTAINING CUSTOMER AFFORDABILITY

Controllable Operating Costs per Customer

(1) Controllable operating cost per customer is a financial measure used by management to evaluate operating efficiency. May not be comparable with measures used by other entities and excludes costs that are considered largely outside of management's control (e.g., purchased power, generation fuel expense).

Key Areas of Focus

- Preventative maintenance and the introduction of innovative practices to reduce costs
- Prioritization of capital investment based on operational needs and associated rate impact
- Utilization of available tax credits
- Energy transition investments generating fuel savings
- Implementation of efficiency programs
- Relationships with partners to maximize value for customers

REDUCING CARBON EMISSIONS

Our planned trajectory to net-zero

SUSTAINABILITY REPORTING

Climate Report (March 2024)

- Climate scenario analysis conducted using low and high emissions scenarios over three time horizons (present day, 2030 and 2050)
- Physical climate risks and opportunities were assessed on priority assets using nine climate hazards
- Transition risk and opportunity assessment were aligned with enterprise risk management principles
- Fortis' business strategy addresses the identified risks and opportunities and informs future work to advance preparedness for climate impacts

Sustainability Report (July 2024)

- Includes 2023 sustainability-related key performance indicators
- Report includes information on resiliency efforts, biodiversity programs, and actions to support energy efficiency and lower emissions for customers
- Highlights recent governance advancements, including a new human rights statement and vendor code of conduct
- Committed to our sustainability initiatives as we pursue growth opportunities and deliver a cleaner energy future, while also ensuring safety and reliability are our top priorities

BALANCED APPROACH TO FUNDING GROWTH

\$26B

Capital Plan
2025-2029

Funding Plan

Equity

Corporation's DRIP at current participation levels⁽¹⁾ and employee share purchase plans

Net Debt

Regulated and non-regulated debt issuances, net of repayments

Cash from Operations⁽²⁾

Cash from operating activities net of dividends and including customer contributions

Key Highlights

- Funding plan largely consistent with prior year plan
- Equity funded through DRIP program
- \$500M ATM program available for flexibility as required
- Consistent capital structure expected over planning period
- 4-6% annual dividend growth guidance range supports reduction in dividend payout ratio over time

(1) Assumes average participation rate of ~38%.

(2) Non-U.S. GAAP financial measure

FUNDING PLAN SUPPORTS INVESTMENT-GRADE CREDIT RATINGS

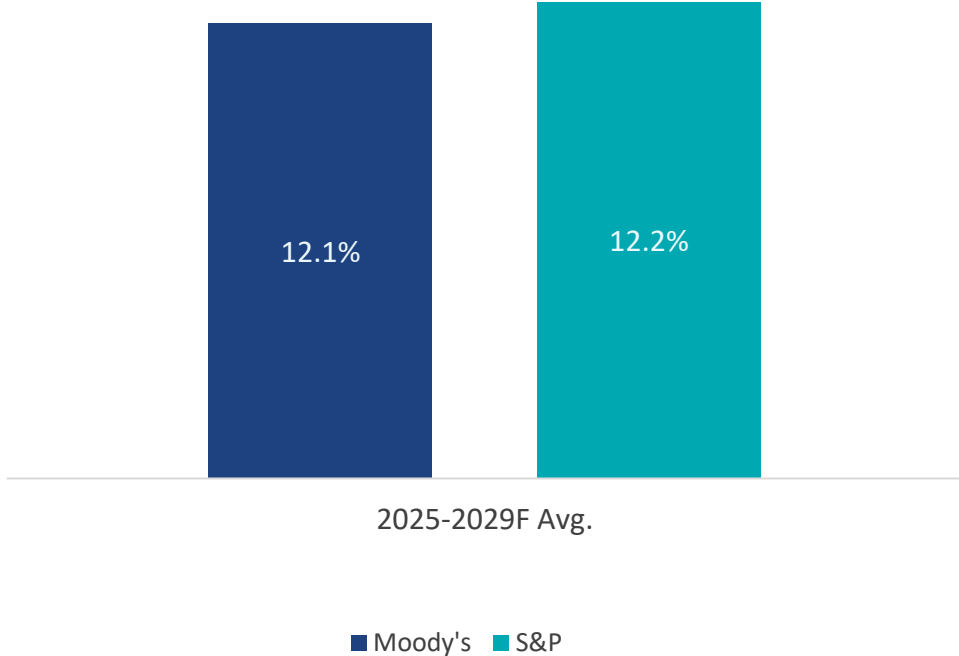

Credit Ratings & Outlooks

MOODY'S Baa3	S&P Global A-(1)	MORNINGSTAR DBRS A (low)
Stable	Negative	Stable

Key Credit Strengths

 Strong business risk profile	 Geographic and regulatory diversity
 Effectively 100% regulated – stable and predictable cash flows	 Constructive regulatory frameworks

Cash Flow to Debt Metrics

(1) S&P rating reflects the issuer credit rating. Fortis' unsecured debt rating is BBB+.

STRONG LIQUIDITY

Q3 2024 Long-Term Debt Issuances

- Fortis Inc. – \$500M 7-year notes at 4.17%
- UNS Energy – US\$400M 10-year notes at 5.20%
- FortisBC Electric – \$100M 30-year debentures at 4.92%
- FortisOntario - \$55M 30-year notes at 5.05%

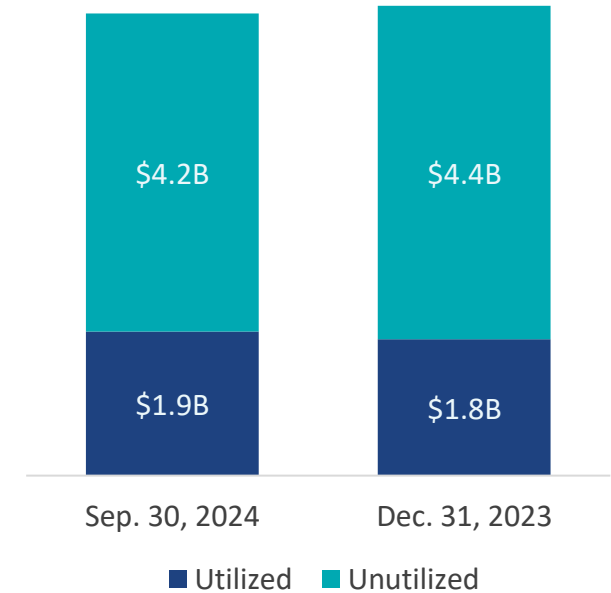

Raised ~\$2.6B in Long-Term Debt through September 2024

Preference Share Dividends

- Preference share dividend rate resets
 - Series M – \$600M (Q4 2024)⁽¹⁾
 - Series H – \$192M (Q2 2025)

Credit Facilities

(1) On December 1, 2024, the annual fixed rate dividend per share for Series M reset from \$0.9783 to \$1.37325 for the five-year period from December 1, 2024 up to but excluding December 1, 2029.

OPPORTUNITIES TO EXPAND AND EXTEND GROWTH BEYOND THE PLAN

- **MISO LRTP Tranche 2.1**
At least **US\$3B** expected in Michigan and Minnesota where ROFRs are in effect; majority of investment anticipated post-2029
- **MISO LRTP Tranche 2.2**
Timing and scope unknown
- **Customer Connections**
Data centers and load growth
- **MISO/ SPP JTIQ**

UNS Energy Corporation
A Fortis Company

- **2023 IRP**
Investment opportunity of **~US\$2.5-\$5.0B** through 2038
- **Potential New Retail Load**
Supporting economic growth in region including data centers
- **Transmission investments**

- **Tilbury LNG Expansion**
Marine bunkering
- **Renewable Gases**

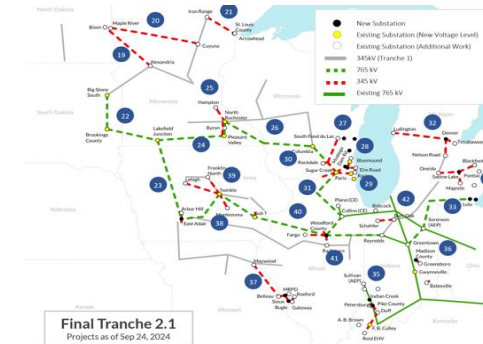

- **Transmission Investments**
Supporting delivery of offshore wind as minority partner in NY Transco

KEY TRANSMISSION INVESTMENTS

MISO LRTP Tranche 2.1

- In September 2024, MISO released its final Tranche 2.1 portfolio of projects which includes 24 projects totaling US\$21.8B
- At least US\$3B of capital investment expected at ITC for projects in Michigan and Minnesota where ROFRs are in effect; majority of investment anticipated post-2029
- Tranche 2.1 approved by the MISO Board in December 2024

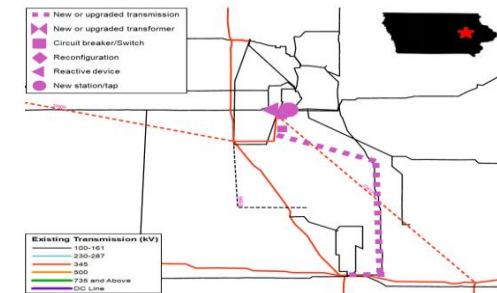

Source: <https://www.misoenergy.org/planning/long-range-transmission-planning/>

Customer Connections

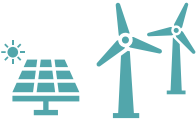

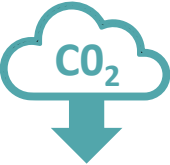

- ITC's plan includes investment necessary to serve the previously announced 300 MW Google data center at Alliant Energy's Big Cedar Industrial Center
- In October 2024, MISO approved the Big Cedar Load Expansion Project for transmission upgrades to serve up to 1,600 MW of new data center load at the Big Cedar Industrial Center, expected to be completed in two phases with targeted in-service dates of 2027 & 2028
 - Project requires franchise approval from the Iowa Utilities Commission prior to construction
 - Total project cost of up to US\$400M

Source: <https://cdn.misoenergy.org/20241016%20PAC%20Item%2004a%20EPR%20Requests652684.pdf>

LONG CAPEX RUNWAY

➤ Responding to stakeholder expectations and capitalizing on opportunities to expand & extend growth

	Connect more renewable generation to the grid		Replace aging assets to maintain reliability
	Build more renewable generation and provide alternative energy sources to reduce emissions		Invest in technology to ensure security and improve service and efficiency
	Expand infrastructure to support load growth from data centers, AI and manufacturing		Prepare grid for additional electrification
	Accelerate climate change adaptation for reliability, grid resiliency and hardening		Business development in existing footprint

RECENT REGULATORY ACTIVITY

MISO Base ROE

- In 2022, the U.S. Court of Appeals for the D.C. Circuit vacated certain FERC orders that established the methodology used to calculate the MISO base ROE
- In October 2024, FERC removed use of the risk-premium model in the ROE methodology; as a result, the base MISO ROE was revised from 10.02% to 9.98%, with a total maximum ROE of 12.58% with incentive adders; the order is effective September 2016 and directs refunds for certain periods⁽¹⁾
- Reduction in the base ROE will impact EPS by less than one cent annually with a total MISO ROE including incentive adders of 10.73% at ITC, compared to 10.77% previously

Transmission ROFR

- In 2023, the Iowa District Court ruled that the Iowa ROFR legislation is unconstitutional, based on procedural grounds; an injunction was granted preventing any action on MISO LRTP Tranche 1 projects in Iowa that depend on the ROFR
- As a result of the inability to construct projects due to the Iowa District Court order, MISO conducted a variance analysis of the MISO LRTP Tranche 1 projects in Iowa; the conclusion issued in August reaffirmed the allocation of projects to ITC and other incumbent transmission owners; work on the Tranche 1 projects in Iowa has resumed⁽²⁾
- Iowa Court proceedings are ongoing for which the timing and outcome are unknown

ACC Generic Regulatory Lag Docket

- In December 2024, a formula rate plan policy statement was approved by the ACC
- The policy statement allows for utilities to propose formula rates with an annual true-up pursuant to the policy statement in future rate cases
- Formula rates plans would reduce the number of existing adjusters and promote rate gradualism for customers
- In January 2025, UNS Gas filed supplemental testimony in its ongoing general rate application proposing an annual rate adjustment mechanism including a formula rate template and implementation protocols

2025 General Rate Application

- In August 2024, Central Hudson filed its 2025 general rate application requesting new rates effective July 1, 2025
- Application seeks an allowed ROE of 10% and 48% common equity ratio
- Timing and outcome of this proceeding remain unknown

Show Cause Order

- In October 2024, the PSC issued a show cause order directing Central Hudson to explain why an enforcement proceeding should not commence in connection with a gas-related explosion that occurred in November 2023
- Central Hudson filed a response in November 2024; the timing and outcome of this proceeding is unknown

(1) The application of the order will result in a regulatory liability of ~\$35M (US\$26M) to be recognized by ITC in Q4 2024. Fortis' 80.1% share of the related after-tax earnings impact will be ~\$22M, of which the vast majority relates to periods prior to January 1, 2024.

(2) ITC's 2025-2029 capital plan includes ~US\$800M in MISO LRTP Tranche 1 projects in Iowa.

THREE-YEAR LOOK BACK

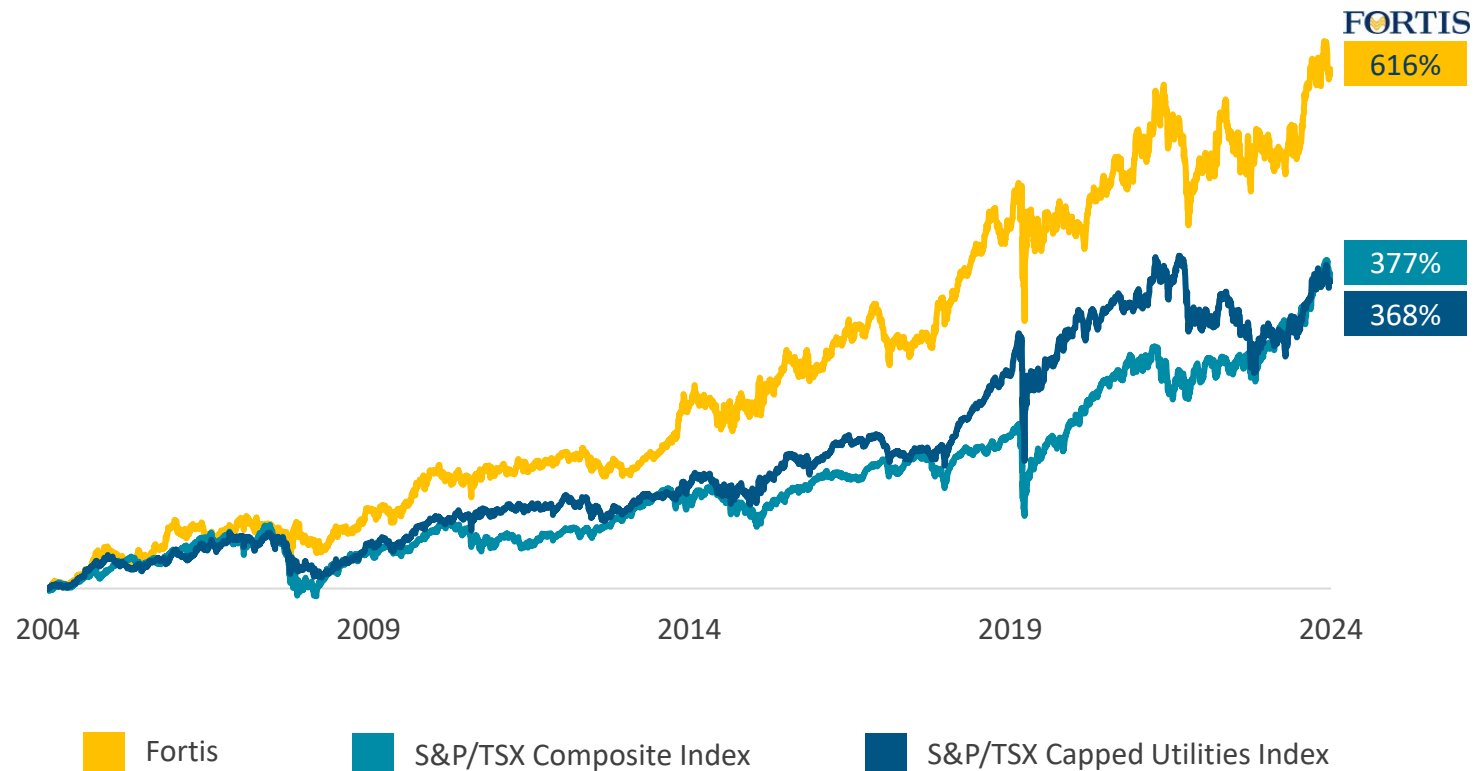

Note: Adjusted EPS and Adjusted Dividend Payout Ratio are Non-U.S. GAAP financial measures. Adjusted Dividend Payout Ratio calculated using annual dividends paid per common share as disclosed in the 2023 MD&A divided by annual Adjusted EPS. Refer to the 2023 MD&A for the Non-U.S. GAAP reconciliation.

(1) 2020-2023 CAGR for rate base and adjusted EPS calculated based on a constant foreign exchange rate.

2023 TEP IRP SUPPORTS EXIT FROM COAL

Exit from Coal On Track

Delivering reliable, cleaner energy that is lower risk and affordable for customers

TEP 2023 IRP Highlights (3,970 MW)

- ✓ 2,240 MW of wind and solar generation
- ✓ 1,330 MW of energy storage
- ✓ 400 MW hydrogen ready natural gas
- ✓ Fully exiting coal by 2032

UNS Electric 2023 IRP Highlights (775 MW)

- ✓ 350 MW of wind and solar generation
- ✓ 225 MW of energy storage
- ✓ 200 MW hydrogen ready natural gas
- ✓ IRP supports reducing wholesale market exposure

Next Steps and Expected Impacts

- ✓ ACC acknowledged IRPs in October 2024
- ✓ Incremental investment opportunity of ~US\$2.5-\$5.0B through 2038⁽¹⁾
- ✓ Adding efficient, flexible, and lower-carbon natural gas-fired resources will help create a bridge to a cleaner energy future

(1) Incremental opportunity of ~US\$2.0-\$4.0B at TEP and US\$0.5-\$1.0B at UNS Electric through 2038.

CENTRAL HUDSON OVERVIEW

ELECTRIC AND GAS T&D UTILITY

15,200 km
of electric T&D lines

2,400 km

Total Rate Base Forecast	38.8	40.7	43.6	46.6	49.9	53.0	6.5%

Note: U.S. dollar-denominated rate base converted at a foreign exchange rate of 1.36 for 2024 and 1.30 for 2025-2029. CAGR is calculated on a constant foreign exchange rate basis.

(1) Fortis has an 80.1% controlling ownership interest in ITC; rate base represents 100% ownership.

(2) CAGR includes CWIP balances at UNS Energy and FortisBC Energy due to significant construction projects in process in 2024 that become rate base later in the planning period. Rate base growth adjusted for CWIP balances of \$0.9B at UNS Energy and \$0.6B at FortisBC Energy, respectively, in 2024, as well \$0.5B at UNS Energy and \$0.1B at FortisBC Energy, respectively, in 2029.

SENSITIVITY EXPOSURE

Foreign Exchange

- Assumed forecast USD:CAD FX rate of 1.30 for 2025-2029
- 65% of regulated earnings⁽¹⁾ / 60% of capital plan in USD at U.S. & Caribbean utilities
- +/- \$0.05 change in USD:CAD
 - EPS: ~\$0.06
 - Five-year capital plan: \$600M

ROE & Equity Ratio

	ROE +/- 25 bps	Equity +/- 100 bps
ITC	\$0.035	\$0.030
UNS Energy	\$0.025	\$0.015
FortisBC	\$0.020	\$0.015
Central Hudson	\$0.010	\$0.005
FortisAlberta	\$0.010	\$0.010

Note: EPS sensitivities reflect forecasted average annual impacts for 2025-2029. Foreign exchange EPS sensitivity inclusive of the Corporation's hedging activities.

(1) Non-U.S. GAAP financial measure for year ended December 31, 2023. Excludes Net Expense of Corporate and Other segment.

ONGOING REGULATORY PROCEEDINGS

MISO Base ROE In 2022, the U.S. Court of Appeals for the D.C. Circuit vacated certain FERC orders that established the methodology used to calculate the MISO base ROE; matter dates back to complaints filed at FERC in 2013 and 2015; D.C. Circuit noted FERC did not adequately explain why it reintroduced the risk-premium model in its methodology which increased the MISO Base ROE from 9.88% to 10.02%; the court remanded the matter to FERC for further process; in October 2024 FERC issued an order revising the MISO Base ROE from 10.02% to 9.98% and removed use of the risk-premium model in establishing the base ROE⁽¹⁾

Notice of Proposed Rulemaking on Incentives In 2021, FERC issued a supplemental NOPR proposing to eliminate the 50-bps RTO adder for transmission owners that have been RTO members for more than three years; stakeholder comments filed in June 2021; the supplemental NOPR and the initial incentives NOPR remain outstanding

Transmission ROFR In December 2023, the Iowa District Court ruled that the manner in which Iowa's ROFR statute was passed is unconstitutional; statute granted incumbent electric transmission owners, including ITC, a ROFR to construct, own and maintain certain electric transmission assets in the state; the District Court did not make any determination on the merits of the ROFR itself, but did issue a permanent injunction preventing ITC and others from taking further action to construct the MISO LRTP Tranche 1 Iowa projects in reliance on the ROFR; in August 2024, MISO concluded its variance analysis of the MISO LRTP Tranche 1 projects in Iowa, reaffirming the allocation of projects to ITC and other incumbent transmission owners; as a result, work on the Tranche 1 projects in Iowa has resumed; various legal proceedings with respect to this matter are ongoing for which the timing and outcome are unknown

2025 General Rate Application In August 2024, Central Hudson filed a general rate application with the PSC requesting new rates effective July 1, 2025; application seeks an allowed ROE of 10% and 48% common equity ratio; timing and outcome of proceeding are unknown

Show Cause Order In October 2024, the PSC issued a show cause order directing Central Hudson to explain why an enforcement proceeding should not commence in connection with a gas-related explosion that occurred in November 2023; Central Hudson filed a response in November 2024; the timing and outcome of this proceeding are unknown

2025-2027 Rate Framework In April 2024, FortisBC filed an application with the BCUC requesting approval of a rate framework for 2025-2027; process will continue throughout 2024, with a decision expected by mid-2025

GCOC Decision In 2023, the AUC issued a decision in the GCOC proceeding and FortisAlberta sought permission to appeal the decision to the Court of Appeal on the basis that the AUC erred in its decision to not adjust FortisAlberta's ROE and common equity component for certain risk factors; in April 2024, the Court of Appeal granted permission to appeal, which is expected to be completed in Q1 2025

Third PBR Term Decision In 2023, the AUC issued a decision establishing the parameters for the third PBR term for 2024-2028; FortisAlberta sought permission to appeal the decision to the Court of Appeal on the basis that the AUC erred in its decision to determine capital funding using 2018-2022 historical capital investments without consideration for funding of new capital programs included in the company's 2023 COS revenue requirement as approved by the AUC; FortisAlberta's application for permission to appeal the decision will be heard by the Court of Appeal in Q4 2024

(1) The application of the order will result in a regulatory liability of ~\$35M (US\$26M) to be recognized by ITC in Q4 2024. Fortis' 80.1% share of the related after-tax earnings impact will be ~\$22M, of which the vast majority relates to periods prior to January 1, 2024.

SUSTAINABILITY LEADERSHIP

Climate and Innovation

- 2050 net-zero direct emissions goal with interim targets to reduce GHG emissions 50% by 2030 and 75% by 2035
- Progress: More than halfway to achieving our 50% by 2030 target with a 33% reduction in scope 1 emissions relative to 2019 levels
- 170 MW of coal generation capacity was retired at TEP in June 2022: expect to be coal-free by 2032; seasonal operations commenced at Springerville in 2023
- Pilot project formed to produce low-carbon hydrogen; FortisBC continues to partner with others, including local universities, to study safe and reliable hydrogen blending with natural gas
- FortisBC increased RNG supply by 21% in 2023, and by more than 10 times since 2019
- FortisBC targets to support the energy transition and reduce GHG emissions:
 - Reduce absolute scope 1 GHG emissions by 35% by 2035 from 2019 levels
 - Reduce customers' GHG emissions by 200k tonnes through participation in conservation and energy management initiatives by the end of 2027
 - Invest \$690M to help customers save 3.8M gigajoules of gas and 115 GWh of electricity by the end of 2027

Community and Indigenous Relations

- Building on our strong record of mutually beneficial partnerships with Indigenous peoples
- FortisBC awarded silver-level designation in Progressive Aboriginal Relations™ from the Canadian Council of Indigenous Business
- 1,800 KM Wataynikaneyap transmission line connecting 17 remote First Nations communities to the Ontario power grid
- ~\$11M of community investment in 2023

Governance Leadership

- Ranked #1 out of 215 S&P/TSX companies in The Globe & Mail 2024 Board Games
- Independent chair; 11 of 12 directors are independent
- 50% of Fortis board members are women; 2 of 12 identify as a visible minority
- Average board tenure of 6.2 years as of January 2025
- Women currently represent 57% of the Fortis Inc. executive leadership team
- 73% of Fortis utilities have a female in the position of CEO or board chair
- Executive compensation linked to climate and diversity targets

DEBT MATURITIES & PREFERENCE SHARE DIVIDENDS

Debt Maturities

Note: U.S. dollar-denominated debt translated at September 30, 2024 closing exchange rate of 1.35.

(1) Includes non-regulated debt maturities at Fortis Inc. and ITC Holdings.

(2) On December 1, 2024, the annual fixed rate dividend per share for Series M reset from \$0.9783 to \$1.37325 for the five-year period from December 1, 2024 up to but excluding December 1, 2029.
